

CO-CREATING A
NEW REALITY FOR
FAMILIES AND WITH
EDUCATORS

> WHY COACTION COLLECTIVE?

When families are meaningfully involved, **students do better in school**. This is clear from both research and real-world experience. Guided by the principles of the Dual Capacity Framework for Family School Partnerships, Coaction Collective works hand in hand with districts and state education agencies. We help to build the capacity of both educators and families to create strong **academic partnerships** that provide every student with the support they need to succeed

> WHAT WE DO:

Live Virtual Educator Learning Series

Our interactive, live professional development sessions give educators hands-on techniques and practical tools they can use right away to strengthen family engagement.

Asynchronous Microcredentials

Bite-sized, self-paced modules provide educators with actionable skills for partnering with families while enabling them to earn credentials that highlight their expertise.

District Level Capacity Building

Coaction Collective works alongside district leaders to strengthen systems, refine policies, and embed family engagement into everyday practice

Educator and Family Resources

We design family-facing and educator-facing tools, guides, and materials to strengthen connections, improve collaboration, and support meaningful partnership between teachers and families.

"[Coaction Collective's] preparation is first class... and has been a game changer for our schools. SSKC has received wonderful feedback from our school partners who see the value in a total school system (staff, teachers and school leaders) shift to adjusting to better engagement of our families to ultimately best support our students' academic achievement."

-Juan Rangel, Chief Partnership Officer, SchoolSmart Kansas City

> OUR PARTNERS INCLUDE:

Don't know where to start?

Reach out to us! Our family engagement listening tours have informed next steps for districts and states across the country. We'll help you ensure your the actions you take are addressing the right challenges.
